

I had a meeting 20060426 with Ia Eriksson-Dobrovich from Studieförbundet Uppsala. She is Coordinator for a project called "Learning in motion"- LIM it's a Socrates grundtvig 1 EU project. 2004-10-01 – 2007-09-30

Definitions and key words

"Outdoor Education is a method of learning with the use of all senses. It takes place out-of-doors in a natural environment or other out-of-doors learning spaces. It is an ideal complement to the classroom and to traditional teaching methods".

- Education/learning
- Out-of-doors
- Use of all senses
- Outdoor learning spaces
- Experience – practical, social and emotional

The project aim is to develop, examine and spread knowledge about learning modules in outdoor education. Containing modules for both physical training and sensitivity training for the group mentally retarded/handicapped people.

During our meeting we find out that we had a lot of connection between BSR Eagle and LIM project. Lot of Nature school/nature centre in Sweden are already working with retarded/handicapped people. But we don't have good materials so here we can help each other to develop new written material that could be used all round Baltic Sea.

The LIM project is going to produce educational/material/book describing exercises/methods for outdoor training. This cooperation will help everyone that is working with handicapped people. The material will be translated to English and spread to partners in BSR Eagle and LIM project.

As coordinator for LIM project Ia Eriksson-Dobrovich will come to Uddevalla in October 2006 there is Helene Grants having a conference for BSR Eagle partners. Ia is going to have a workshop about how can we work with retarded/handicapped people out of doors.
